

Opening the Door To Green Building and Sustainable Design

Registered with AIA as AIA CES Course TRUSD1

Registered with NCIDQ Registry Service as ASID Course #8483

Members of AIA, ASID, IIDA, IDEC and IDC can receive credit for this course.

1 LU Hours — Eligible for Sustainable Design (SD) Credits

This AIA/CES course will explore how MDF and Wood stile and rail doors fulfill Green Building principles and contribute to LEED certification.

At the end of the program, participants will be able to:

- Define Green Building and understand how doors can contribute to Green Building and Sustainable Design
- Understand green product options for paint grade doors and how they can contribute to LEED Credits and design
- Understand green product options for stain grade doors and how they can contribute to LEED Credits and design
- Understand how else door manufacturers can contribute to green manufacturing and sustainable practices
