

The New American Remodel 2019 features new products and systems that have recently been introduced to the housing market. TruStile Doors sponsored the interior doors for the home and displayed our new Tru&Modern Flush wood doors.

TruStile flush wood doors feature 1/4" thick veneers which are hand matched to optimize the beautiful character found across each species of natural wood. The design team of The New American Remodel chose Walnut doors with TruStile's new Ebony finish. The doors are a beautiful complement to the other natural textures found throughout the home. They were also used in a variety of applications including swing doors, barn doors, and bypass doors.

Every TruStile door is made to order with premium materials, endless design options, and flexible manufacturing to create the perfect look for your project.

An oversized barn door makes an impressive entrance to the guest bedrooms from the living room.

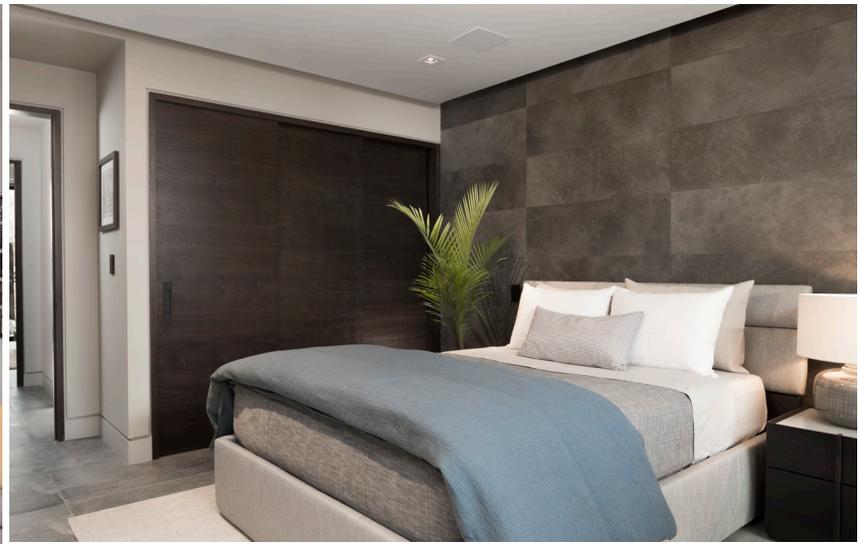

Horizontal grain flush wood doors in Walnut with an Ebony finish add elegance to this modern home and blend perfectly with the other natural finishes in each room.

The master suite is a work of art that creates an environment of relaxation and sophisticated comfort.

The casita uses a barn door to separate the living room from the bedroom. Bypass closet doors save space in the bedroom and look stunning next to the adjacent concrete wall.
