Beverly Luxury

Contemporary Mediterranean New Construction

Beverly Luxury, a stunning 13,500-square-foot Contemporary Mediterranean estate in the heart of Dallas, exemplifies how TruStile's custom interior doors can elevate architectural design—transforming a luxurious residence into a functional work of art. Built by Nixon Custom Homes, this exquisite property is crafted with bespoke details at every turn. Drawing inspiration from the timeless elegance of 16th-century villas by Italian architect Andrea Palladio, the home seamlessly blends classical influences with modern, family-centric living spaces.

The home features custom cabinetry, intricate ceilings, and limestone flooring quarried in Morocco. Wood beams reclaimed from a 19th-century Ohio barn add warmth and character to the elegant interiors. Nixon Custom Homes combined TruStile's TS4100, TS8000, and TS8010 doors with Bevel (BV) sticking and Scoop (B) panels to enhance the home's harmonious blend of indoor & outdoor living. These doors perfectly complement the Palladian-inspired style of the home. The Beverly residence is a prime example of how TruStile doors elevate the look, feel, and flow of a home.

TS8010 common arched pair and radius top in rift sawn white oak with Bevel (BV) sticking and Scoop (B) panel.

Statement doors throughout the home highlight key spaces and provide architectural depth. The grand foyer features a common arched pair that sets the tone and reinforces the home's classic yet contemporary design ethos.

Glass inserts add a pop of brightness and create architectural focal points in the home's family spaces.
