

Security, Style and Smart Access for TruStile Entry Systems

Exterior doors demand more than security. They must provide reliable weather sealing, accommodate natural structural movement, deliver everyday ease of operation, and complement the architectural style of the home.

TruStile's entry hardware solutions are designed to meet these requirements through the integration of advanced multi-point locking technology, premium trim options, and smart lock compatibility.

For the Reserve Wood Entry System™ and Resilient Wood Entry System™, TruStile offers GU Secury Automatic multi-point locks that provide enhanced security, superior door sealing, and dependable performance.

Available with both leverset and gripset configurations, these systems can be paired with a wide range of decorative hardware styles to support virtually any design vision.

Leversets and gripsets are sold separately by the hardware manufacturer. TruStile Dealers have resources to help you select compatible trim and lock sets.

Benefits of Using Multi-Point Locks on TruStile Entry Systems

- Stainless steel, single piece design provides years of reliable operation.
- Automatic bolt engagement upon door closure eliminates the need to lift the handle like other multi-point locks.
- Compatible with many popular brands of multi-point handle trimsets (sold separately by other vendors).
- Adds strength and rigidity to keep a solid door seal in extreme temperatures created by darker finishes.
- Provides superior security against forced entry over traditional locksets.
- Maintains a strong seal between door leafs on double doors
- Industry leading warranty coverage on TruStile Resilient Wood Entry System™ doors when multi-point locks are used in applications with no overhang, or when doors are painted in darker colors.*

* See TruStile's Resilient Wood Entry System warranty for more information.

Multi-Point Lock Trimsets

TruStile entry systems with GU Secury Automatic multi-point locks are compatible with a variety of leverset or gripset trims depending on which model of Secury Automatic multi-point lock is selected.

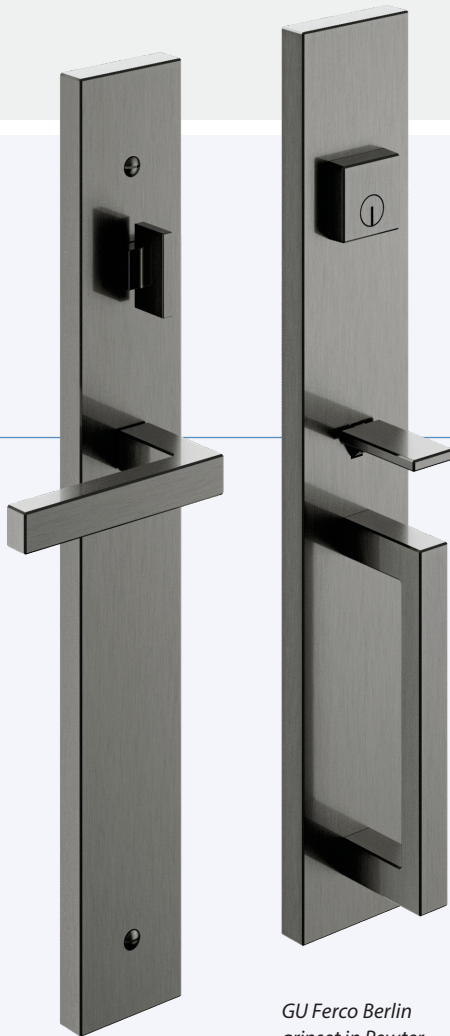

Lever versions of the GU Secury Automatic multi-point lock work with trimsets from multiple manufacturers while the GU gripset multi-point lock is only compatible with GU Ferco gripset style trimsets.

Lever sets

Lever sets are a traditional trim option for multi-point locks. They are easy to operate and available in many shapes and sizes to match the look and feel a homeowner desires.

in Satin Nickel*

*GU Ferco Berlin
gripset in Pewter*

Gripsets

Gripsets offer an elegant door opening option that features a vertical handle with a thumb-operated lock mechanism for the exterior and a rotating lever for the interior.

GU Ferco manufactured gripsets are the only versions that are engineered to operate GU Secury Automatic multi-point lock systems. They are available with or without Tedee smart lock

Lever sets and gripsets are sold separately by the hardware manufacturer. TruStile Dealers have resources to help you select the correct compatible hardware.

Known Compatible Trimsets by Top Hardware Brands

The following trimsets are known to work with TruStile entry doors equipped with GU Secury Automatic multi-point locks. Trimsets are sold separately by the hardware manufacturer and may be subject to change. TruStile Dealers have resources to help you select the correct compatible hardware.

Smart Locks

Tedee PRO Smart Lock

The Tedee PRO smart lock replaces the thumb latch on the interior side of a door lock, allowing remote control of the deadbolt via Bluetooth. On a multi-point lock, this is available only with trimsets from GU Ferco, however you can choose either a leverset or gripset.

Tedee PRO Smart Locks are sold separately by the hardware manufacturer. TruStile Dealers have resources to help you select the correct compatible lock.

Tedee PRO Smart Lock Details

- GU Secury Automatic multi-point locks are compatible with Tedee PRO smart locks only. Tedee GO and GO2 smart locks are not supported at this time.
- Tedee offers Integration with many home automation platforms directly or via a bridge. Refer to the Tedee website for details on compatibility.
- Add-ons available for connectivity and additional safety and convenience include: door sensor, keypad, and bridge, which allows you to connect to a larger home ecosystem.
- Available in multiple finish options to match the rest of the door hardware.
- 6- to 10-month battery life between charges with easy-to-use magnetic charge cable included.
- Tedee PRO smart locks are compatible with Tedee-specific versions of GU leverset and gripset trims that cleanly integrate the unit into the trim plate.
