Casing-Less Jambs

Cross-Section of Casing-Less Jamb Installation with Concealed Hinge

- Requires jamb installation prior to drywall
- Jamb width should be same as stud width
- Swing range may be limited

Recommended:
Phillips U-200 trim or similar

Cross-Section of Casing-Less Jamb Installation with Barrel Hinge

- Jambs can be installed after drywall
- Swing range may be limited

Recommended:
Phillips L-200 trim or similar

MODERN JAMB SYSTEMS
Casing-Less Jamb Installation

Assemble and install jamb before hanging drywall.

Lift drywall to baseboard height using a block for support. Overlap jamb with drywall to create the desired amount of reveal.

Finish drywall edges with U-bead, J-bead or similar drywall trim.

Trim remaining drywall and install baseboard.

⚠️ MOUNT CONCEALED HINGES TO JAMB FIRST USING SUPPLIED SCREWS.

Align door with hinges and mount with provided screws. Adjust hinges if necessary and attach cover plate.

Baseboard Idea:
Return your trim to the jamb for a beautiful shadow line at the base of each opening.
Flush-to-Wall Jambs

Cross-Section of Flush-to-Wall Jamb Installation with Concealed Hinge

Recommended:
Phillips L-200 trim or similar

Note: Drywall bead will be slightly proud. For a completely flush look oversize the jamb width accordingly.

Jambs can be installed after drywall

Complexity Level

Cross-Section of Flush-to-Wall Jamb Installation with Barrel Hinge

Recommended:
Phillips L-200 trim or similar

Note: Drywall bead will be slightly proud. For a completely flush look oversize the jamb width accordingly.

We recommend our 5/4 or 8/4 jamb to achieve a bold look.

Complexity Level
Flush-to-Wall Jamb Installation

Lift drywall to baseboard height using a block for support. Mount drywall and trim to rough opening. Install jamb.

Assemble and install jamb before hanging drywall. For this application, you may need to remove stop before installation.

Finish drywall edges around jamb with L-bead or similar drywall trim.

Finish remaining drywall edges and install baseboard.

Align door with hinges and mount with provided screws. Adjust hinges if necessary and attach cover plate.

**Baseboard Idea:**
Consider finishing your recessed trim at the same width of your jamb for a sleek modern look.
Reveal Jambs

Cross-Section of Reveal Jamb Installation with Concealed Hinge

- Jambs can be installed after drywall

- Tip: Insert backer rod after installation to protect the reveal and jamb through drywall finish

- Recommended: Fry Reglet “F” reveal or similar

- Design shim space to the dimension of your chosen reveal trim

Cross-Section of Reveal Jamb Installation with Barrel Hinge

- Jambs can be installed after drywall

- Tip: Insert backer rod after installation to protect the reveal and jamb through drywall finish

- Recommended: Fry Reglet “Z” reveal or similar

- Design shim space to the dimension of your chosen reveal trim
Reveal Jamb Installation

Assemble and install jamb before hanging drywall. For this application, you may need to remove stop before installation.

Lift drywall to baseboard height using a block for support. Mount drywall and trim to rough opening. Install jamb.

Finish drywall edges around jamb with reveal trim.

Finish remaining drywall edges and install baseboard.

Align door with hinges and mount with provided screws. Adjust hinges if necessary and attach cover plate.

⚠️ MOUNT CONCEALED HINGES TO JAMB FIRST USING SUPPLIED SCREWS. Reinstall stop if necessary.

Baseboard Idea:
Continue the reveal trim and finish with painted recessed baseboard for a touch of definition within a clean modern look.
TruStile flush wood doors feature hand-selected veneers, precision matched to optimize the beautiful character found across each species of natural wood.

**Distinguishing Features:**
- Hand matched ⅛” veneers available in horizontal and vertical grain
- Highly engineered core provides stability for the door, while the matching hardwood edge provides a beautiful finish
